HAZ FEARS ASSASSINATION; IS KEPT CLOSELY GUARDED.

GENERAL TROOPS PENNED UP;
COMMANDER IS A PRISONER.

REVOLUTIONISTS HAVE GOVERNMENT
TROOPS SURROUNDED
WITH ALL AVENUES OF ESCAPE
SHUT OFF.

MEXICO CITY, Dec. 20.—President
is living in constant fear of as-
sination as the result of the dis-
covery of all kinds of plots of the
Revolutionists.

Food with which the president
is first tasted by attaches of
palace and his sleeping room is
guarded each night. A secret guard
surrounds the palace constantly.

General Prisoner—
PASO, Tex., Dec. 20.—The Mex-
ican government troops sent to
the revolutionists in Chihuahua
are penned up in Padernales and
their commander, General Navarre, is
a prisoner of the Rebels, according
to reliable reports received here to-
day.

There is no escape for the sur-
rounded army unless it cuts its way
out of all avenues of escape being cov-
ered with Rebel machine guns. There
are 3,000 Rebels in the field waiting
for another remnant of the Federal
troops to come from the city of
Mexico to reinforce the Rebels. The
orders given to the government troops
from Mexico City are, "Take the
prisoners."

The Rebels are threatening death
to General Navarre unless the al-
lotted wrongs inflicted upon the
people by the Chihuahua authorities
are redressed.

ORMOND ROAD HAS BEEN POSTED.

TOWN OFFICIALS OF HOLLY HILL
DECIDED TO POST THE ROAD
UNTIL SUCH TIME AS NEEDED
REPAIRS CAN BE MADE.

The river road to Ormond has
been posted with placards warning
drivers of automobiles and other ve-
hicles that they use said road at
their own risk.

This was done to relieve the town
of responsibility in case of dam-
age to persons or vehicles until
a time as the needed repairs can
be made in places washed out by the
flood in October.

The road at that time was made
usable, if proper care was exer-
cised by drivers, but it is very rough
in some places, and even dangerous,
if care is not used.

Drivers insist upon using this road
matter what its condition and just
as it is impossible for the town to
provide the material for the necessary
repairs and surfacing of the road.

WILL CURB THE POWER OF LORDS.

PROGRAM OF PARLIAMENT
ANNOUNCED IN ADVANCE.

THE QUESTION OF GIVING HOME
RULE TO IRELAND WILL NOT
BE TAKEN UP FOR A YEAR OR
TWO.

LONDON, Dec. 20.—With but a
show of resistance the bill for curb-
ing the power of the House of Lords
will be passed by the new parliament,
according to the program as an-
nounced in advance.

The question of home rule for Ire-
land will be shelved for a year or
two, also, and if the new parliament
is unable to carry this program
Premier Asquith will relinquish the
leadership. Parliament meets in
February. It is generally believed
the Unionists are losing in strength.

MILLIONS OF SEALS SOLD;
WILL BRING IN \$500,000.

TUBERCULOSIS FIGHTERS IN THE
UNITED STATES WILL REALIZE
BIG SUM TO HELP ERADICATE
DISEASE.

WASHINGTON, Dec. 20.—Reports
from headquarters of the American
Red Cross given out today indicate
that at the beginning of the last
week of the sale of Christmas Seals,
nearly 35,000,000 have been sold and
that the prospects are bright for a
sale of more than 50,000,000.

The actual number of Seals sold to
date is nearly 15,000,000 in excess of
the entire number sold in 1909, and is
already nearly three times the sale
of 1908. If the sale this week keeps
up at the same rate as since De-
cember 1, the national authorities es-
timate that over \$500,000 will be ad-
ded to the tuberculosis funds in all
parts of the country. This will be
double the amount realized last year.

Engaged in this campaign for sell-
ing Red Cross Seals is an army of
over 100,000, including men, women
and children of every rank and sta-
tion. Agents have been appointed in
one or more places in every state, ex-
cept Idaho and Montana. Among the
groups and institutions which are as-
sisting in the movement are the Anti-
Tuberculosis societies, Red Cross
chapters, Women's clubs, Labor
unions, lodges, schools, banks, thea-
ters, department stores, hospitals and
innumerable other agencies. Thou-
sands of dollars worth of advertising
is being donated to the campaign, and
many millions of circulars are being
distributed to remind people to buy
Red Cross Seals.

BURLEY GROWERS IN FIVE
STATES HAVE PLAN TO CON-
TROL OUTPUT OF TOBACCO IN
THE YEAR 1912.

LEXINGTON, Ky., Dec. 20.—The
Burley tobacco growers of Kentucky,
West Virginia, Ohio, Indiana and
Missouri met here today and agreed
to pool the 1911 crop and raise no
tobacco in 1912. More than 100,000
growers producing more than 3,000,
000 pounds annually are affected.

CRIME.

DURHAM, N. C., Dec. 20.—James
Sander, his young daughter and his
granddaughter were found murdered
this morning in the southern part of
Granville county.

Nathan Montague, a negro, was ar-
rested here, accused of the crime.
The authorities claim they have pos-
itive evidence that Montague criminally
assaulted the girl, then murdered
her, and finally murdered her father
and granddaughter and fired the
home.

Threats of a lynching are being
heard on all sides and the jail is be-
ing strongly guarded.

FRANK HAYNE IS ON TRIAL
FOR COTTON CONSPIRACY.

NEW YORK, Dec. 20.—Frank
Hayne, head of the cotton firm of
Payne & Brown, of New Orleans, to-
day pleaded not guilty before Federal
Commissioner Shields on an indict-
ment by the federal grand jury in
connection with an alleged cotton
pool conspiracy. He was held in

VICTORY FOR RAILROADS IN DECISION.

EXPORT RATE MAY BE LOWER
THAN THE DOMESTIC RATE.

INTERSTATE COMMERCE COMMIS-
SION HOWEVER, RESERVES
THE RIGHT TO CONSIDER ALL
COMPLAINTS.

WASHINGTON, Dec. 20.—The rail-
roads of the country gained a victory
today in a decision handed down by
the Interstate Commerce Commission,
which declares that a railroad is not
violating the interstate commerce
laws in fixing the export freight
rates lower than the domestic freight
rates, with certain exceptions.

Upon this decision the railroads
may continue to fix the export rates
lower than the domestic freight rates.
The commission, however, reserves
the right to consider complaints
against any particular rate.

DRIVEN INTO THE COLD
IN THEIR NIGHT CLOTHES.

OWENSEBORO, Ky., Dec. 20.—The
Kudd hotel was burned here this
morning and more than a hundred
guests, who were compelled to flee
into the cold in their night clothes,
had narrow escapes from death. Several
were injured in the panic. The
loss will be \$25,000.

W. H. Wright this morning re-
paired the damage to the gold let-
tering on the Daily News windows,
resulting from the recent fall storm.

All Sorts of Schemes

All sorts of schemes to catch the
unwary are being resorted to. Min-
ing stock and oil wells have been
very much in evidence the past year
and many gullible ones have lost
whatever they invested, but it re-
mained for a fellow in Chicago to
reach the limit on a real estate deal.
He advertised lots within two miles
of State and Madison streets for \$100.
Such an opportunity was not to be
ignored and he sold hundreds of
them all over the country. Some
fool after having parted with the
money thought he would take a trip
to Chicago and look over his pur-
chase. He found the advertiser had
told the truth. The lots were with-
in two miles of State and Madison
but were not available for building
purposes being in the bottom of Lake
Michigan. This was another dream
of wealth shattered. You will have
times of thinking that this good old
bank is slow, but paste this in your
hat, brother, she is safe, and money
you drop in here you can get out
again, while that you invest in lots
at the bottom of Lake Michigan re-
mains forever on your list of "water-
ed stock."

Irma Weerman immediately went to

people aboard the two ships.

FIRST NUMBER OF COURSE
TO BE WIZARD GERMAIN.

LYCEUM COURSE OF SIX NUM-
BERS WILL BE STARTED AT
DAYTONA THEATER NEXT FRI-
DAY EVENING.

Many people are under the impres-
sion that a lyceum course is just a
series of dry lectures and the man-
agement of the new Daytona The-
ater desires the straighten this mat-
ter in the minds of its patrons.

The lyceum course this season will
consist of six high class entertain-
ments and concerts carefully select-
ed from the best lyceum attractions
on the southern circuit.

Owing to the inopportune death of
Laurant's wife, Germain, the Wizard,
will take his place as the first num-
ber of the course. The management
was fortunate to secure the service
of so well known a man as Germain.
He is without doubt one of the best
artists in his line on the stage to-
day, and he is rightly named "the
Wizard" because of his marvelous
and mysterious illusions.

Everybody should avail themselves
of the opportunity to see this won-
derful man and his able company,
this coming Friday evening, Dec. 23.
Those who do not care to secure
tickets for the six numbers, can se-
cure their reserved seats for this

GOLD SHIPPED FROM ALASKA
DOESN'T REACH DESTINATION.

FEDERAL AND OTHER OFFICERS
WORKING ON CRIME WHICH
MAY HAVE TAKEN PLACE ON
CANADIAN SOIL.

SAN FRANCISCO, Dec. 20.—About
\$80,000, one-fourth of which is in
gold bullion has been stolen enroute
from Fairbanks, Alaska, to this city.

Just where and when the precious
cargo disappeared is a mystery and
all the Federal officers, as well as
other authorities, in this part of the
country are now working on the case.
It was shipped at Fairbanks and
never reached its destination at this
place. The crime may have taken
place on Canadian soil.

Several arrests have been made
and some of the suspects have been
found with large quantities of bullion
in their possession.

SENATE ALLOWS CLAIMS
AMOUNTING TO \$2,000,000.

WASHINGTON, Dec. 20.—The Sen-
ate today passed the omnibus claims
bill for the payment of \$2,000,000 in
claims against the government. The
French spoliation clause of nearly a
million was included.

GET STUCK IN THE SNOW;
AUTO TRIP IS ABANDONED.

MINNEAPOLIS PARTY COM-
PELLED TO SHIP MACHINE
FROM MARION, KENTUCKY, AS
FAR AS JACKSONVILLE.

Interrupted in their plans for a
pleasant automobile trip from St.
Louis to Daytona by heavy snow in
Kentucky A. T. Moot, wife and son,
were compelled to ship their big
automobile from Marion, Kentucky,
to Jacksonville to find weather and
roads suitable for auto driving.

The Moot family lives in Minnea-
polis and made the trip from the
Minnesota metropolis to St. Louis
by rail. At St. Louis they purchased
a big touring car and started for a
pleasure trip through Kentucky and
Indiana, intending to extend the trip
through to Miami, where Mr. Moot
has business interests and where
they planned to spend the winter
months.

After making part of the trip they
were stalled by snow at Marion, Ky.,
and compelled to ship the car to
Jacksonville, the members of the
party making the trip by train. At
Jacksonville they again took to the
automobile, driving the car through
to Daytona without mishap. They
made the run here from Jacksonville
Sunday and stopped over Monday at
guests at The Willmar, continuing
their trip south Tuesday.

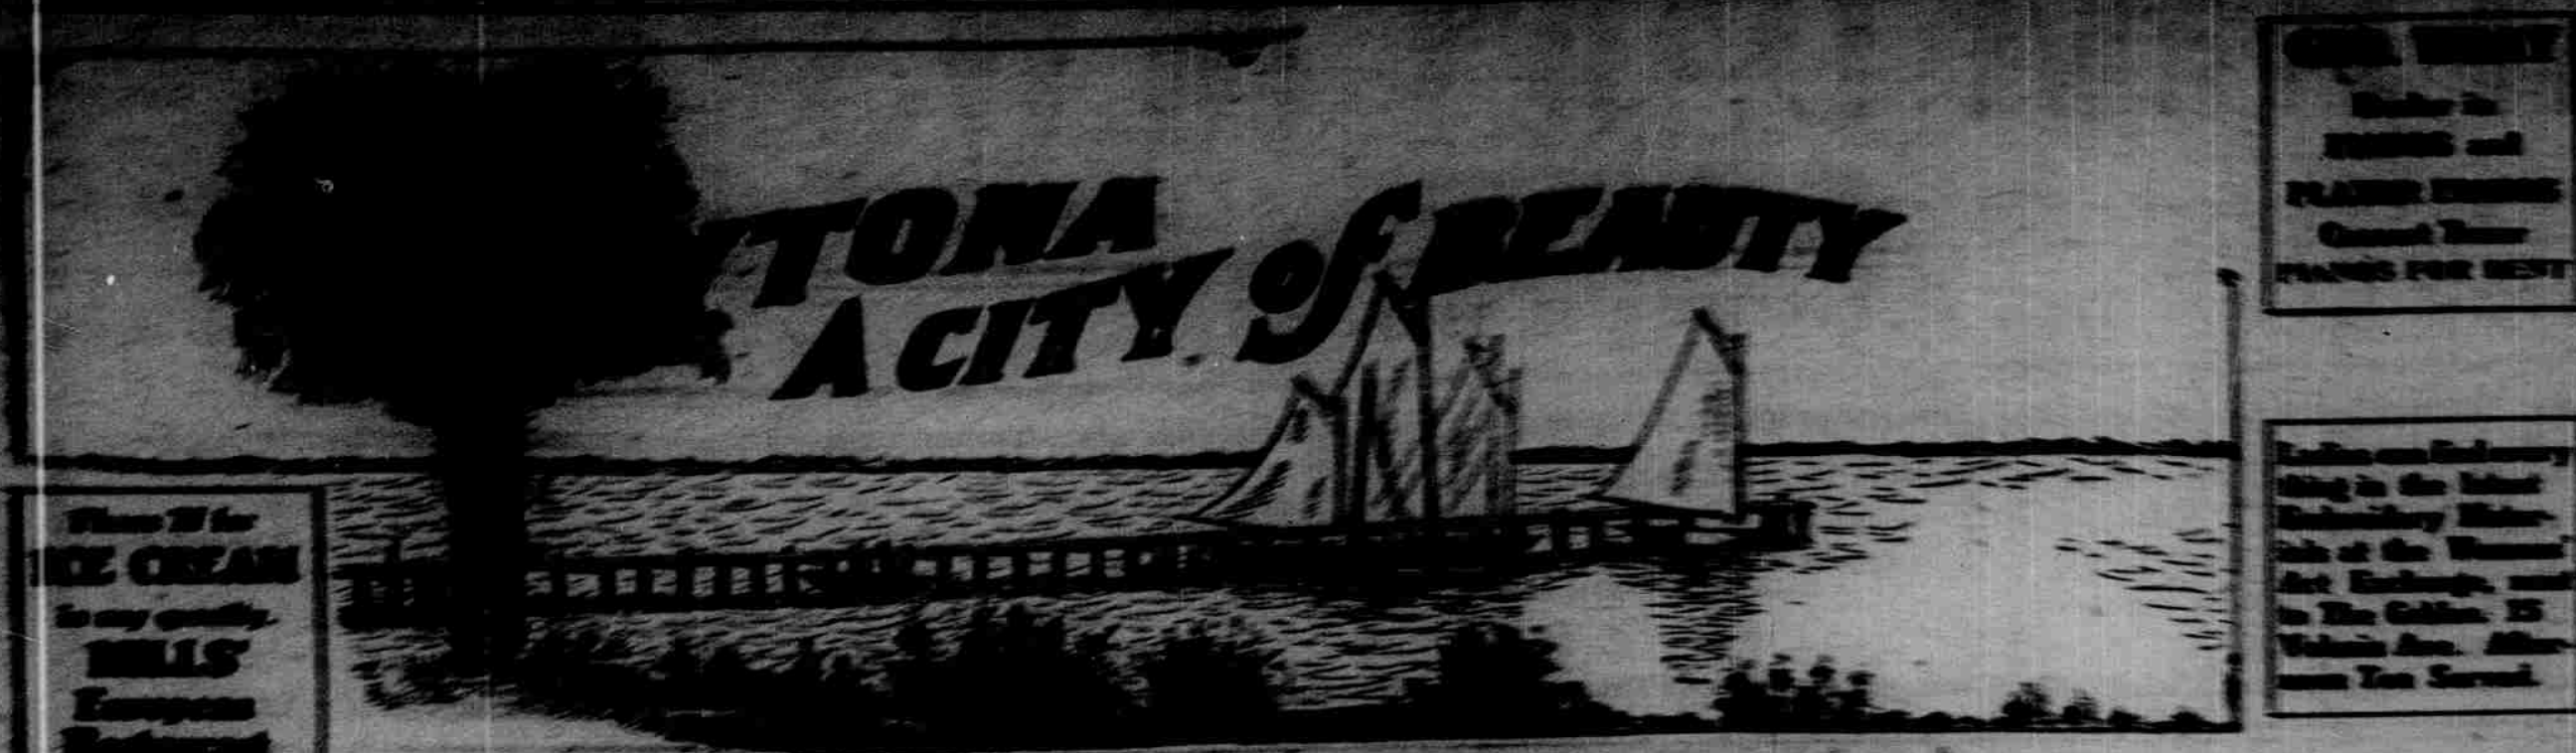

Mr. Moot and his family were
much impressed with the beauties
of Daytona and they will likely re-
turn to this city for a longer stay.

By L. C. DENAREE.
One of Daytona's crowning glories is her incomparable beach. No one who has ever set foot upon its smooth, packed sands, no one who ever paddled a kayak over its expanse, no one who ever drove a speeding pair of horses and listened to the popping of their steel shoes upon its asphalt-like face, no one who ever steered a high-power automobile down the broad stretch of wave-washed and surf-packed sand but realized that it is a world better, a world wider. Go stand upon this wide highway and see the happy souls fit by in joyous mood, and answer whether this is not one of the seven modern wonders.

The Placid, Pallid Halifax River. Where think you is water with more picturesque surroundings? Nearly a mile wide, fringed with tropical vegetation, artistic cottages with many verandas looking out upon her bosom gather food fishes in countless numbers beckoning, as it were, to those with rod and reel. Her beach is dotted with ducks and coot and stow-winged sea birds, which sit about as if for the sport of looking upon the water; watch that lubberly old white headed pelican perch a fat mule, and that fish hawk struggling upward with his floundering load he assisted from the water.

See the beautiful beaches, spick and span, with lampers and lockers, bathing with refreshments, both solid and liquid, ready for a cruise upon the beautiful surface. Take out your field glass and sweep the river from Grand bridge to Ponce Park light house, then say whether the Halifax isn't a thing of beauty and a joy forever, and one of the modern wonders.

The Enchantingly Picturesque Ridgewood.
Ridgewood avenue is upon the crest of a broad ridge, straight as the crow flies and the wide spreading branches of the heavy-trunked live oaks extend their giant arms across the magnificent vista, forming an arch, and from these extended arms great festoons of Spanish moss sway as the trade winds from the tropic seas fan them. Looking straight ahead down this white shell street one has the impression of a fairy path with "faded" draperies, but as you move along and cast an eye first to the right and then to the left you see distinguished cottage homes in the most delightful settings.

See the glistering lead of the grand magnolia which nature has varnished as no artist's brush ever could; and the cabbage palms with their burdens of showy fruit and swaying palms; see the lovely holly with its exquisite berry; see the climbing vine run riot in the trees; see the cypress-trees which gain a foothold on the great oaks and stately palms, and surely you will join in the chorus and say that this is a world wonder for beauty.

Surpassing Beauty of Our Cottage Homes.
No one of Daytona's attractions, perhaps, commands more nearly universal attention and praise than does the artistic cottages. The owners of these charming villas hail from every corner of the country and they bring their own architectural plans and build upon them, and, as the architecture of one section of the country differs from the architecture of another so do our homes differ in outward appearance and structural beauty from one another. There are no monotonous rows of strikingly similar buildings but the eye, as it sweeps by, is treated to a kaleidoscopic change which keeps the mind wondering, "What next?"

It is not only the exterior of many of these homes which rivets attention; within they are models of convenience, and the finishing and furnishing give evidence of the elegance and cultivation of those who worked it all out. Indeed, it is the interior arrangement and artistic furnishing and shading, more than the exterior appearance that gives a surpassing charm to Daytona homes. This feature justly merits prominence as another wonder.

Streets and Pavements the Most and Best.
Why the Architect of the Universe chose to give Daytona the most admirable, the most picturesque natural setting of all the cities of the South is not revealed, but that such is a

That must be apparent to the most superficial observer. With such lavish wealth of natural beauty it became an easy thing for the land of water to give the fishing tackle which have wrought out the colors and outlines of the big picture.

Man did all this in the laying out of the streets with their wide margins of parkage. The entire city becomes a great park, with driveways intersecting, miles upon miles of driveways as good as to attract motorists from all over the continent.

And as for the pavements, pavements that look and act like granite—where, else between the eastern and western seas are so many miles in proportion to inhabitants? The pavement question stands with the street as one of the chief drawing cards. Till some unheard of place reports more and better, Daytona draws down the gamut to the world.

Squirrels, Flowers, Birds and Fruit. Whatever one's shortcomings and however indifferent or even callous one may be to many things, the mere mention of "flowers and squirrels, birds and fruits" will send a thrill that is reflected in disordered pupils and pricked ears.

For every visitor with a spare goose there is a bounty ready to come and accept your gift. He will sit bolt upright and know into the meat, casting furtive, sunny glances at you meanwhile.

Flowers. Usually fresh and blooming the year 'round, you are reminded of Goldsmith's couplet where smiling spring its earliest visit paid and summer's lingering blossoms are delayed.

In one yard masses of variegated hues predominate; another household has a petunia for the poinsettia and the premises are all alike; another is hidden in a jungle of tall cane. Variety is the spice of life and here is where you find it.

The birds fit in, and with their joyous notes help to give fullness and symmetry to the picture. As for fruits, choose citrus fruits. Daytona yields the palm to none for quality and quantity per acre. There are scores of citrus groves in proximity to the city, branches bending to the earth with their burdens of luscious golden globes, which for beauty, profuseness and all desirable qualities would truly astonish you.

The Fastest Autos and The Finest Out.
The seventh world wonder, do you ask? Come, whether from Missouri or from Maine, from Kalamazoo or Timbuctoo, and you will be "shown." Here is where the world's record for speed is broken with every recurring season. Autos, the biggest, the fastest, and the finest are on daily parade and the big show is as free as the pure artesian water from the thousands of flowing wells. It is a continuous show with a constantly shifting scene.

Everything goes, from a 2-horse power up to a 200-horse power, and all degrees of speed from a canter to a two-mile-a-minute clip. You will probably catch the spirit, when you do the roads and the beach are yours. The Florida sunshine is free, the balmy ocean breezes are free, the birds and squirrels and flowers are free, the sparkling fountain water is free and you will have to go down into your wallet only for coin for auto, and bed and board.

This is no fanciful picture; it's all here. It is drawing other thousands and holding them enthralled, it will charm and hold you. Come and see.

The Why and Wherefore of Many Army Customs.

HAND AND SWORD SALUTES.

The Origin of the Former Goes Back to the Time of the Borgias and the Latter to the Knights of the Crusades—Funeral Volleys and Taps.

Why does a soldier when saluting a superior raise his hand to his head covering? The beginning dates back to the time of the Borgias, if not to an earlier date. In those days assassination was in vogue, and in order that an inferior might not have a superior at advantage the inferior was compelled when coming into his superior's presence to raise his right hand, palm to the front, to show that no dagger was concealed there. From this old custom our hand salute has come down.

The salute with the sword was not done that way in the beginning without any reason. When knights of the crusades received their orders it was the custom for them to call upon God to witness their assumption of the orders given. To do this the sword was raised to the front so that the hilt reached the lips, when the cross formed by the hilt and blade could be kissed and an oath registered to carry out the orders faithfully. The dropping of the sword, point to the front, indicates submission.

Why in the funeral cortege of a mounted officer or soldier is the horse, saddled and equipped, with the boots of the late rider placed heels to the front in the stirrups, led to the place of burial? To show by reversal of the boots the owner's march has ended.

We must go back to the days of the Romans for the reason why in the service three volleys are fired over the open grave of a comrade. Among the Romans the burial consisted of the throwing of earth three times on the coffin. Three times was the dead man called by name, which ended the ceremony, and as the friends and relatives departed each said "Vale!" three times. So as a farewell to our dead comrades we fire three volleys over the grave. Then the service called taps is sounded, this closing the ceremony.

Why should the call taps be sounded in preference to any other? Because taps is the call for "lights out," and the lights of life are out in the comrade who has "joined the silent bivouac of the dead." This ending of a service funeral dates back to the early forties, but did not become a fixed custom till late in the civil war.

There was a reason for causing all witnesses before a military court to remove the glove from the right hand

before taking the oath. The raising of the hands and eyes toward heaven when taking an oath is of great antiquity. When the Bible was printed the bare hand was laid on the book, which was afterward kissed. But the Bible was not always at hand when needed. So the custom of raising the right hand and uncovering the head has grown into general practice. In olden days the criminal was branded in the palm of the right hand, and for this reason the custom of requiring the removal of the glove came into vogue in order that the hand might be inspected.

The colored silk sash long worn by officers of our army, which for many years has ceased to form part of the uniform, except for general officers, was not adopted simply because it looked pretty. It was originally intended that this sash, which was very strong, woven of silk and could be stretched out to over a yard in width, should be used as a hammock in which wounded officers could be carried off the battlefield.

And likewise the gaudy colored horsehair plume that flowed from the helmet was not placed there because it looked so well. The original hair plume hung down on the shoulders of the wearer, and it was intended that it should be a safeguard against a sabre cut aimed at the back of the neck, for the long thick hair would turn the blow and save decapitation or an ugly wound. Today the little hair tuft seen on the headress of mounted soldiers is the result.

There is a reason why the flag at half staff, as an indication of sorrow, must always be hoisted to the top of the staff before being lowered. The flag is saluted when raised and lowered only when it is at the peak of the staff. So when it is necessary to display it at half mast it must be raised to the top before being finally lowered, for at this time the gun fires its salute, and either the band or the trumpeters are sounding appropriate music or call.

Twenty-one guns, the number fired in the international salute, were not selected at random. The number was chosen by our government because it was the number long used by the British for their international salute. Why the British used twenty-one guns was no doubt due to an early custom which had for a warship salute seven guns. A fort was allowed to fire three times as many guns as a warship, because in those days it was difficult to keep powder in good condition at sea. It could be kept in good condition on land, and consequently the shore battery was allowed a larger number, or twenty-one. When the time arrived that better powder was made and it could be carried at sea without deterioration the warship was allowed the same number of guns as the shore battery, and the twenty-one of today are the result. —Major B. W. Atkinson, U. S. A., in Chicago Record-Herald.

RACE SERIES
NOW PLANNED
FOR SPRING.

WOULD HOLD THREE MEETS;
DAYTONA TO COME FIRST.

PLANS BEING WORKED OUT BY
R. M. BOND AND MR. MOROSS
IS FOR OTHER MEETS AT JACK-
SONVILLE AND ATLANTA.

A series of three automobile race meets to be held in the south next spring, one on Daytona beach, one at Jacksonville and the other at Atlanta, is the plan now being worked out by E. A. Moross, former manager of the Indianapolis speedway, who has been in Jacksonville for several days working up enthusiasm among the automobilists and business men of that city.

Mr. Moross believes the success of a meet in Jacksonville is assured and he will be in Daytona tomorrow to consult with the automobilists and business men here about holding the first of the three meets on Daytona beach. Mr. Moross is being assisted in his effort by R. M. Bond, president of the Florida East Coast Automobile Association.

The plans of Messrs. Moross and Bond are to hold an aviation meet in connection with each one of the race meets, the principal feature of the meet on Daytona Beach to be a race between an aeroplane and automobile from Mosquito Inlet to the club house.

Mr. Moross has assurances from a large number of prominent racing automobile drivers and car manufacturers that they will enter cars in this series of races and he believes the series can be made the most successful of any automobile race meets ever held in the United States. The fame of the Daytona beach as a racing ground and the records established here will make it a drawing card all over the country and more cars would be brought here for entry in a series of meets than in one single event.

THE SARATOGA INN

A MODEL HOTEL.

HOUSE WAS REBUILT IN LARGE
PART AND REMODELED
THROUGHOUT DURING PAST
SUMMER—ALL MODERN CON-
VENIENCES.

The Saratoga Inn, the season advertisement of which appears as usual in the columns of the Daily News, is practically a new house this season having been rebuilt in part, and remodeled throughout, the past summer, under the supervision of that capable architect and builder, E. S. Hall.

This house is now one of the most comfortable and thoroughly up-to-date hotels of the city, modern in every detail, with both public and private baths, electric light, hot and cold running water and hot water heating system, installed by Joseph Osborne. Fire escapes are provided from the front porch, rear of building and the rooms.

In the construction of the building double floors were laid, with building paper between and this paper was likewise used in the side walls and partition walls, deadening sounds and making the house almost impervious to cold.

The front of the building is odd, but attractive in design, having a partly enclosed porch on the second story upon which the front rooms on that floor converge and this comfortable lounging place as well as the roomy piazza on the ground floor overlook the beautiful Halifax river and peninsula. The house continues under the able management of that experienced hotel man, John J. McGuire.

MORE COTTON GINNED

THIS YEAR THAN LAST.

WASHINGTON, Dec. 20—The census report today shows 10,698,482 bales of cotton of the 1910 crop have been ginned up to December 13, against 9,358,085 bales last year. The ginning of Sea Island is 75,170 bales against 85,177 last year.

TO ADOPT
HOME PLANS
NEXT WEEK.

NEW BUILDING FOR ELKS
WILL BE STARTED SOON.

BUILDING COMMITTEE TO HOLD
MEETING THURSDAY TO MAKE
SELECTION AMONG SETS OF
PLANS SUBMITTED.

Plans for the new Elks' home to be erected by the Daytona lodge at the corner of Volusia and Palmetto avenues will be definitely adopted at the regular meeting of the lodge next week Tuesday evening, then the contract for the erection of the building will be let and work will be started as soon as possible.

A meeting of the building committee was held in the lodge rooms Monday evening, when plans were discussed. The committee found it was not ready yet to fully consider definite plans and an adjournment was taken until Thursday evening, when five sets of plans will be ready for inspection. These will be thoroughly considered and discussed by the members of the committee, a selection from among them will be made and the selection will be submitted to the lodge at the regular meeting Tuesday evening.

At this time the best set of plans will be adopted by the lodge and the matter of having the building erected will be turned over entirely to the building committee, which will be instructed to have the structure ready for occupancy early next spring.

How Much Are You Really Willing to Pay?
 Find Out Now!

As a result, many people in the Midwest and others are now in constant communication with me personally. But most of all, it is because I have been teaching the correct teachings about Jesus' death. Many who have left the faith have been converted, but this must be done on a systematic, systematic basis. I have been able to do this because I have been able to do this.

The second track, with the most recent one being laid in 1964, is the standard gauge, although much of the road is now to be converted into a single-track system to reduce the costs. The track is the longest continuous one system where every station is served every minute for 12 hours, and all these tracks is dedicated to the service.

With the advent of the Christmas holiday season comes the necessity for a thorough understanding on the part of the public as to the sending of letters and packages through the United States mails. A careful study of the requirements exacted by the postal authorities will save much annoyance and possible loss to both senders and recipients of Christmas mail.

Every letter should be carefully sealed and every package securely tied. The address must be plainly written or printed in full, and the name and address of the sender should, in every case, be marked on the mail matter in order that the mail may be returned to the sender in case there should be anything contained therein which would preclude its transmission through the mails. This is especially necessary in the case of packages sent to foreign countries. A large number of packages are mailed every year, especially at Christmas time, which do not leave the postoffice on account of containing articles which the postal regulations do not permit being dispatched. Without the name of the sender upon them, these packages are sent to the Dead Letter Office at Washington, and thus lost to the rightful owners.

The public is cautioned not to put any writing on the wrapper other than the name and address of the one to whom mail is sent and the name and address of the sender. Any other writing, except a greeting of three to five words, subjects the matter to first class rates of postage.

As to the use of Red Cross stamps, on letters of packages, the public is informed that these stamps will not be considered in any respect, as postage, and any matter for admission to the mails must have the required amount of postage affixed thereto, irrespective of the Red Cross, or charity stamps, which should be affixed to the reverse side of the envelope or wrapper.

The strict observance of these regulations requires little effort on the part of the public and saves the authorities trouble, besides insuring satisfaction and prompt delivery of the holiday mail.

Town Topics.

Philadelphia is the ninth city of the world in point of size and the first in the universe from the point of attractiveness as a residence.—Philadelphia Inquirer.

Most cities would be mighty glad to have available for expenses what New York pays out in interest annually. For 1911 interest on the city debt will be \$34,000,000.—Tacoma Ledger.

When travelers can enter Kansas City by means of \$30,000,000 worth of new terminals, into the new five and a half million dollar Union station, the joys of homecoming will be greater than ever.—Kansas City Star.

Train and Track.

Two hundred tons is the average weight of an English passenger train.

Thirty-three railroads are at present under construction under the direct supervision of the Chilean government.

Electric locomotives capable of a speed of about forty-three miles an hour are used to haul trains through the Simplon tunnel in Switzerland.

The Pennsylvania railroad system will shortly have available for use on its lines east and west of Pittsburgh and Erie 1,988 solid steel passenger equipment cars. This includes some 600 Pullman parlor and sleeping cars.

Money Matters.

Smaller sized paper money would likewise be more in proportion to its present purchasing power.—Indianapolis News.

Cashiers at garages will have to be more on the alert than ever. A counterfeit \$100 bill of deceptive appearance is in circulation.—Cincinnati Enquirer.

A half cent piece might be a valuable addition to our coinage system if there could be effective legislation to provide some article that could be bought with it.—Washington Star.

Honey.

Honey has been known from the earliest times. The scriptures make mention of it, and pagan writers celebrated its virtues. It was called "the milk of the aged" and was thought to prolong life. Honey was also used in the embalming of the body after death.

THE SPITBALL.

It Takes Great Strength and Speed to Pitch It Properly.

Describing the spitball in baseball and the way it is pitched, Hugh A. Fullerton in the American Magazine says:

"There came into baseball in 1903 a ball which came near revolutionizing the game and brought a new era of pitching, made great pitchers out of 'two-bases' and poor hitters out of once mighty sluggers.

"The ball is pitched with two, sometimes with three, fingers held on one side of the ball and with the thumb or tip of the thumb and nail being gripped hard against the seam at the opposite side of the sphere. The top of the ball is made slippery at the point of contact with the fingers, so that the sphere slides off the fingers with the minimum of friction, while the thumb, pressed hard against the seam, gives the maximum of friction, the result being that the ball, leaving the hand, takes heavy 'English' from the thumb and starts revolving rapidly in the direction opposite to that in which it naturally would rotate. Therefore it whirls rapidly for a short distance until the natural but suspended motion of the ball overcomes the false 'English' applied by the thumb and a contest between the natural and unnatural forces ensues. The ball ceases revolving unnaturally and floats and wobbles until the natural twist overcomes the false one, and then the ball darts just as it would have done if it had been curved naturally, shooting in the direction in which the heaviest friction was applied. A spitball if pitched directly overhand darts almost straight downward, and if pitched side arm with the thumb toward the body it shoots outward and down as a fast outcurve does, the quickness and speed of the break depending entirely upon the amount of force with which it is thrown and in ratio to the amount of friction applied by the thumb or lack of friction by the fingers. Great strength and speed are essential to the best pitching of this kind of ball."

TOMBS OF THE PHARAONS.

The Precautions Taken to Guard Against Grave Robbers.

The ingenuity displayed by the ancient Egyptians to prevent robbers from breaking into the pharaonic graves merits admiration from present day engineers, writes Dr. Holscher, chief architect in the Prussian government, in a work on the sarcophagus of Khafra, the builder of the second Gizeh pyramid, who reigned in Egypt some 5,000 years ago.

The lid of the red granite sarcophagus was dovetailed with minute precision into the receptacle. To prevent the cover from being drawn back the Egyptian builders bored two holes in the lid at the edge, not showing above. These corresponded exactly with two similar holes, less deep than the other two, sunk in the front of the receptacle. Two copper bolts were then placed in the lid holes, and at the moment the sarcophagus was fully closed the holes met and the bolts dropped in position from the upper holes partly into the lower, thus making it impossible to move the lid.

It must have struck the Egyptian engineers that grave robbers might get at the body by turning the sarcophagus upside down, in which case the bolts would glide back into their original position and permit the lid being drawn out. To prevent this they filled the lower holes with wax and made the bolts hot. Upon the lids being placed in position the bolts melted their way into the wax and upon cooling became so firmly fixed that nothing short of complete destruction could open the royal tomb.

It must have been a herculean labor to hew the whole edge away, but that is what grave desecrators did, and the wax can still be seen in the bore holes.—New York Sun.

The "House Fly."

The reminiscent man suddenly found a gap in the conversation.

"I was in Kansas once," he began, "when one of those old time cyclones struck the town. I happened to be in my brother's house at the moment and heard the roar of the coming wind. I knew enough to run out in the street and lie down in the gutter with my arms clasped around a hitching post. The next moment the cyclone hit the town. Say, you ought to have seen the house fly."

"Did you swat it?" inquired the mean man on the soap box.

And the story promptly ended.—Denver News.

An Ancient Steam Man.

There are a host of authorities on hydraulics and mechanics that could be quoted to support the assertion that the steam engine is not a modern invention. Carpin in the account of his travels, A. D. 1286, describes a species of aeophile, or steam, engine made in the form of a man. This contrivance was filled with "inflammable liquid" (probably petroleum) and made to do terrible work in the battles between the Mongols and the troops of Prester John.

Remarkable.

"He takes a cold bath every morning—a very remarkable man."
"Plenty of men do that."
"But I knew him for five years before he ever mentioned the fact."—Louisville Courier-Journal.

The Easier Way.

"Do foreigners buy many of our stocks?"
"Some. Usually, though, they prefer to acquire them by marriage."—Pittsburgh Post.

The Worst Enemy of the Poor Is the Bad Samaritan, the Free Giver.

By President WILLIAM De WITT HYDE of Bowdoin College.

THE WORST ENEMY OF THE POOR IS THE BAD SAMARITAN—THE SOFT MINDED MAN OR WOMAN WHO HELPS POVERTY WITHOUT UNDERSTANDING ITS CAUSE AND THEREFORE WITHOUT HELPING THE POOR TO FIND THE CURE.

Every person who indulges in the selfish and sentimental luxury of feeding tramps or giving indiscriminately to persons who come to him with a TALE OF WOE is one of the SOFT HEADED BAD SAMARITANS.

Punishment of crime, though necessary to society's self protection, is still only the A B C OF THE RIGHT TREATMENT OF THE CRIMINAL. The indeterminate sentence for the first offenders, a supplementary sentence for confirmed criminals, special treatment for juvenile offenders, in every case the appeal to hope by encouragement and opportunity rather than merely to fear by restraint and brute force—in a word, the treatment of the individual in the light of what he has been and can become, not merely the treatment of the crime he has committed in the light of a general law and a fixed penalty—these are some of the steps forward already taken by some states, but not in all.

Above all, charitable and penal institutions should be placed under the supervision of a PERMANENT BOARD, WITH AN EXPERT AS ITS SECRETARY, and there should be no charitable or penal interest or institution that could find the shelter of darkness for its policies or deeds.

For without any criticism or reflection upon our existing institutions it is a fact which every enlightened state should frankly face that any supervision short of that by a well paid nonpartisan expert is a form of darkness more or less dense, under cover of which incompetence and corruption soon or late are sure to breed.

LIKED THE FRYING PANS.

Indians Found an Exciting Use For the Cooking Utensils.

The Indian, however averse he may be to any kind of useful labor, is not slow to avail himself of a new source of amusement. This was shown some years ago when among the supplies sent by the government to a certain agency in the west were several hundred large frying pans with long handles.

These the Indian agent found in stock when he took possession, and at the end of the year the number had not been diminished. Thinking that perhaps he had not discharged his whole duty in the matter of supplies, Uncle Sam's wards with these culinary utensils, the agent began making special efforts to induce the red men to use them.

At first it was hard work, but by the time he had given out about two dozen there came a sudden change. Not a day passed in which the agent did not have applications for at least a dozen, and some days he disposed of twice that number.

When the supply was nearly exhausted he noticed among the applicants some to whom he had previously given pans, and naturally enough he became a trifle curious to know what use they were making of them. He questioned several of the men to no purpose, but at length a young buck more communicative than the rest gave him to understand that if he would visit a certain part of the reservation not far away he would find his inquiry answered.

The next day, therefore, the agent rode out in the direction indicated. About two miles from the agency he noticed on the crest of a narrow spur of the mountain three or four Indians who suddenly disappeared on the opposite side of the ridge. At the same time he heard faintly the cry of many voices.

On turning the point of the ridge he saw a crowd of several hundred Indians who were shouting as if greatly excited. He noticed also several objects, which he at first supposed to be bowlders, descending the side of the mountain toward them with tremendous rapidity.

Instead of fleeing from these moving objects the Indians simply applauded and shouted. Soon he saw other objects like the first descending, and in a short time the whole situation was plain to him.

Having selected a long, smooth slope of the mountain where there were no stones, the Indians had converted it into a sort of earthen toboggan slide and were utilizing the frying pans as toboggans. Seating themselves in the pans, they grasped the handles with both hands; then, crossing their legs over their arms, they went spinning down the slide with great rapidity. The agent let them have the few pans that remained in the storehouse, but did not order a new supply.—Harper's Weekly.

Her Bad Habit.

Heart to Heart Talks.

By EDWIN A. NYE.

SHE HAD NO MOTHER.

This is the sad story of Mrs. Anna Pearl Ryan, mother of a four-year-old boy at nineteen.

Mrs. Ryan was arrested in Chicago for cashing a check in Memphis, Tenn., and admitted her guilt.

Which looks bad. But wait until you hear her side of the story, an experience told by the little woman, scarcely more than a child, as she related it at the police station between sobs:

"My husband won my heart and we were married when I was a mere child. My mother was dead. Married at fourteen, my baby was born when I was scarcely fifteen.

"At that time I weighed only eighty-three pounds, and I don't weigh much more than that now. My husband stood more than six feet tall and was a powerful man.

"After awhile he wearied of me and began to abuse me shamefully. When I could stand his cruelty no longer I got hold of one of his checks for \$60, cashed it and ran away with my baby.

"I have worked my fingers nearly to the bone to keep my baby, and I went to South Dakota and to Iowa and Missouri and then here, trying to keep them from arresting me."

Pathetic as the story is, one can read between the lines. The cruelty of the big husband became intolerable, and in order to escape from the brute the girl followed her instincts and fled.

And she had no mother. Do you remember the touching prayer of Elspeth in Barrie's "Sentimental Tommy"? How she sobbed out to God—

"I'm so little and I hinna no mother."

Poor, frail Anna Ryan was so little—only eighty-three pounds—and she had no mother.

Of course the law said the little thing must go back to Memphis and be punished (as if she had not been punished). Big police officers are very jealous lest the majesty of the law be violated.

You say the girl was weak, or foolish, or even sinful? Suppose she was all of these. What could you expect? But in her heart she was not wicked; only tormented and desperate.

With her girlish hands she had reached out impulsively for the sweets of human happiness and grasped only the bitterness of cruelty and disappointment.

Put yourself in her place. Might you have done better? Maybe you have merely been more fortunate than she.

And remember—she had no mother.

The Judge's White Gloves.

In the olden days judges were forbidden to wear gloves on the bench for fear of bribes being dropped into them. If there were no cases to be tried, however, there was no opportunity for bribing, and the sheriffs might give the judge a pair of gloves; hence the custom of presenting a judge with a pair of white gloves when he has no cases to try at an assizes.

HEALTH OFFICER STEWART SAYS THAT THE SANITARY CONDITIONS OF THIS UP-TO-DATE CITY BE IMPROVED.

The city of Daytona needs a sewer system. Are any of the several candidates for Mayor in the coming election willing to go on record as pledged to the support of a system of sewerage and pledged to work with the city council toward that end?

One of the questions which has stood in the way of putting in a first class system of sewers in Daytona is that of bond issue and the ability to dispose of the bonds if they were issued. The city health officer, who has made a study of the sanitary conditions in Daytona and its suburbs for several years, says a system of sewers is badly needed here. His interest in this matter has led him to thoroughly investigate all sides of the question and he has now found a man who is willing to purchase the whole issue of bonds, if the citizens of Daytona are willing to issue them for the purpose of installing such a system.

City Health Officer Stewart has written the Daily News the following interesting communication on this subject:

Editor Daily News:—All during the tenure of my office I have repeatedly urged the necessity of a comprehensive system of sewerage for the city of Daytona. All along the improvement has met with the hearty approval of a large number of our citizens. All that has been accomplished in this direction up to this time is a few private sewers, all of which empty into the Halifax river. These private sewers serve only a very small portion of the city, while the great unwashed portion of the city is depending on a very unsatisfactory scavenger service.

The city of Daytona has always enjoyed a most enviable record as to health, cleanliness and beauty. The city has grown rapidly and the population is becoming so congested that sanitary measures simply sufficient for all of our needs a few years ago are now miserably insufficient. In a short time the public need has called forth many valuable additions and improvements. Just a few years has seen Daytona emerge from the clothing of an insignificant village to the proportions of a city.

Practically all of the demands of a growing city here have been met until today the city seems to have no very important need except to round it out with a first-class sewerage. After all, the question of sewerage is the most important, the most vital, for any community in which any considerable number of people are living.

One of our townsmen informs me he will be glad to take over the entire bond issue necessary to install a first class sewerage system, so there need be no trouble about getting the money necessary to have the system established here. E. L. STEWART, City Health Officer.

On account of Delay in arranging fixtures the opening of our new place has been delayed.
